SUMMARY

I’m a Senior Full Stack Java Developer with 2+ years of experience building secure, scalable, and high-performance applications. My expertise spans Java, Spring Boot, Kafka, React.js, MongoDB, Elasticsearch, and cloud-native deployments on Kubernetes & AWS.

I specialize in designing microservices architectures, implementing event-driven systems, and ensuring resilience and observability in production using CI/CD pipelines and modern monitoring tools.

With a strong background in capital markets, banking, and trading systems, I bring real-world experience in building low-latency, fault-tolerant, and data-driven platforms. I thrive at the intersection of backend, frontend, and cloud infrastructure, delivering end-to-end solutions that meet business and technical goals.

EDUCATION

Post-Graduation in Information Technologies Solutions 2022 - Dec 2023 Humber College,Toronto	May
Bachelor of Science in Information Technology 2018 - April 2021 GLS University	June

SKILLS

Languages & Frameworks: Java (8–17), Python, JavaScript, TypeScript, SQL, Spring Boot, Spring Cloud, Hibernate/JPA
Front-end: React.js, Redux, HTML5, CSS3, Bootstrap, Tailwind
Back-end & APIs: RESTful APIs, GraphQL, Node.js, Express.js
Databases & Messaging: MySQL, PostgreSQL, Oracle, MongoDB, Elasticsearch, Redis; Apache Kafka (Streams, Connect), RabbitMQ, ActiveMQ
Cloud & Big Data: AWS (EC2, S3, Lambda, API Gateway), Azure, Google Cloud Platform; Databricks (Delta Lake, Unity Catalog, Spark SQL)
Containers & Orchestration: Docker, Kubernetes
DevOps & Tools: Jenkins, Git/GitHub, Maven, GitHub Actions, Docker Compose
Security & Compliance: OAuth2/OIDC, JWT, Two-Way TLS, Spring Security, Swagger/OpenAPI
Testing & Monitoring: JUnit, Mockito, Postman; ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana
Methodologies & Collaboration: Agile/Scrum, TDD, CI/CD, code reviews, JIRA, Confluence

PROFESSIONAL EXPERIENCE

Reactive Stax- Mississauga, CA 2024 - PRESENT SENIOR FULL STACK DEVELOPER - Architected and built scalable Spring Boot microservices using Kafka Streams and CDC patterns. - Designed RESTful and gRPC APIs with OpenAPI/Swagger specifications. - Containerized services with Docker; managed Kubernetes/OpenShift deployments. - Automated CI/CD pipelines in Jenkins and GitHub Actions for builds, tests, and deployments. - Implemented centralized logging (ELK Stack) and monitoring (Prometheus/Grafana) to maintain 99.99% uptime. - Led Agile ceremonies (stand-ups, sprint planning, retrospectives) and mentored junior engineers in TDD and best practices.	AUG
Shyamsir.com- Toronto, CA 2024 - JUL 2024 SENIOR SOFTWARE DEVELOPER - Led a team to deliver Spring Boot microservices for customer account management, improving API response times by 30%. - Mapped complex domain models with Hibernate/JPA and optimized MySQL queries for large datasets. - Containerized services and managed Kubernetes ConfigMaps and Secrets for multi-environment deployments. - Implemented Jenkins CI pipelines: automated builds, unit tests (JUnit, Mockito), and Docker image publishing. - Developed React.js front-end components with Redux and Tailwind CSS, enforcing JWT-based authentication and secure form validation.	JAN

KnowQuest- Toronto, CA

2024 - DEC 2024

FULL STACK DEVELOPER (Intern)

- Built Node.js/Express REST APIs for user profile management, achieving <200 ms cold-start times on AWS Lambda.
- Developed React.js dashboards with Redux; improved page load times by 25% through lazy loading and caching.
- Wrote unit and integration tests (Jest, Supertest) and configured GitHub Actions for CI workflows.
- Collaborated in a 4-person Agile team using JIRA and Confluence to translate business requirements into technical user stories.

SEP

Shyamsir.com- Gujarat, India

2021 - APR 2022

SOFTWARE ENGINEER

- Developed Java/Spring MVC web applications with CRUD functionality backed by MySQL and Hibernate/JPA.
- Built RESTful Spring Boot endpoints for order processing, handling JSON payloads and standardized error responses.
- Wrote unit tests (JUnit, Mockito) covering 80% of service and repository layers.
- Assisted front-end development using JSP, HTML5, CSS3, and vanilla JavaScript for dynamic form handling.
- Participated in Agile/Scrum ceremonies, conducted root-cause analysis on production issues, and documented API specifications in Confluence.

MAY

ENGINEERING PROJECTS

Recreational Center Management

- Developed a React.js front end with role-based access control, integrating with a Spring Boot REST API secured via Spring Security.
- Configured Two-Way SSL (mutual TLS) on all REST calls, ensuring encrypted, authenticated microservice communication.
- Integrated Twilio for OTP-based user verification, improving account security and onboarding flow.
- Leveraged Redis for in-memory shopping cart state, enabling sub-millisecond read/write performance under high concurrency.
- Containerized the full stack with Docker and orchestrated on Kubernetes, enabling zero-downtime rolling updates and simplified scaling.
- Implemented automated end-to-end tests with Cypress, validating UI workflows and API integrations.
- Created Grafana dashboards to monitor API latency, error rates, and Redis cache hit ratios.

Trade Processing System

- Developed a React.js front end with role-based access control, integrating with a Spring Boot REST API secured via Spring Security.
- Configured Two-Way SSL (mutual TLS) on all REST calls, ensuring encrypted, authenticated microservice communication.
- Integrated Twilio for OTP-based user verification, improving account security and onboarding flow.
- Leveraged Redis for in-memory shopping cart state, enabling sub-millisecond read/write performance under high concurrency.
- Containerized the full stack with Docker and orchestrated on Kubernetes, enabling zero-downtime rolling updates and simplified scaling.
- Implemented automated end-to-end tests with Cypress, validating UI workflows and API integrations.
- Created Grafana dashboards to monitor API latency, error rates, and Redis cache hit ratios.
